

# DIFFERENTIATION INVESTIGATION

## EXAMPLE:

Add in 400uL of Stem Cells to a well.

Choose which growth factors you will treat the stem cells with.

Add in one drop of each growth factor selected.

Record which growth factors you used and the result!

|   | 1                                                                 | 2                                                                 | 3                                                                 | 4                                                                 | 5                                                                 | 6                                                                 |
